

ENVIRON COOL PEEL® FAQ's

Q What is the level of discomfort during an Environ Cool Peel® Treatment?

A The Environ Cool Peel is gentle and well-tolerated with no downtime. You may experience mild tingling or a cool sensation during the treatment.

Q What are the risks of an Environ Cool Peel®?

A Environ's Cool Peel is very safe when done by a trained Skincare Professional. You may experience some transient effects, but you will be guided on how to manage these.

Q Are Environ Cool Peels safe during pregnancy?

A Yes. Cool Peels are safe during pregnancy but should only be done under the guidance of your Medical Professional.

Q Are Environ Cool Peel® Treatments restricted to winter?

A No. You can enjoy your Cool Peel treatments all year round. Ensure you apply a broad-spectrum sunscreen daily.

Q How many Cool Peel Treatments are recommended for best results?

A A course of 6 treatments, spaced 1-2 weeks apart is recommended. Your Skincare Professional can personalise your treatment plan based on your skin's unique needs.

Q How do I prepare my skin for an Environ Cool Peel®?

A Use vitamin A products, antioxidants and apply a broad-spectrum sunscreen daily for 3-4 weeks before your treatment to build your skin's resilience and optimise results.

Q How to include Environ Cool Peel® Treatments between other aesthetic treatments?

A It's best to wait at least 2 weeks between all treatments. Ask your Skincare Professional for your personalised plan.
